

# Ecolift XL backwater lifting st. Duo, 1 motor flap, SPF 1500-S1, Taper

## Article information

Item no.: 8741065 GTIN: 4026092070741 Price group: 60

### **Advantages**

- Wastewater drainage without interruption, even if a power failure occurs, as long as there is no backwater
- low pump use
- minimised noise emissions

### Description

The backwater lifting station for non-faecal wastewater is equipped with two submersible pumps, one motor-driven and one mechanical closure system and a backflow preventer. The collection tank made of permanently resistant polymer (PE) has an enclosed pump tank. Quick-release closures enable the integrated components to be removed easily. Normally, draining takes place via the natural fall to the sewer. Backwater is detected by an optical probe, which causes the motor-driven closure system to close automatically and there is no longer free passage to the sewer. During the backwater phase, the water drains via a pressure pipe, which carries the wastewater into the sewer. The pressure pipe is a welded PE pipe; with pump SPF 4500, the pressure pipe must also be continued up to a pressure release chamber. The station is controlled by a user-friendly control unit, which is optionally integrated in the building management system via a potential-free contact, or alarm and collective fault messages can be output via a GSM interface. The KESSEL modular system provides different upper sections and engineering chamber options as accessories.

#### Variant Note on installation depth: Type of system: Shut-off valve: Passage seal for conduit pipe (DN): Passage seal for ventilation pipe (DN): Pump control:

Version with lowest installation height duo pump Shut-off valve made of polymer 100 70 Control unit

Backflow preventer: Pressure pipe connection: Motor-driven backwater flaps: Mechanical backwater flaps:	integrated horizontal 1 1
General characteristics Colour: Standard: Type of wastewater: Installation situation: Delivery state:	black ÖNORM B 2501 without sewage underground installation Pre-mounted for final assembly on site (pumps and sensor system must be fitted on site and control unit must be connected)
Backwater protection: Approval:	Туре 3 Z-53.2-493
Dimensions Net weight: Gross weight: Groundwater resistant from lower edge of base section:	161 kg 185 kg 3000 mm
Vertical drop between inlet and outlet: Length:	15 mm 1379 mm
Width:	1200 mm
Height:	785 mm
Packaging dimension:	length
Packaging dimension:	width
Packaging dimension:	height
Tank/drain body	
Nominal pressure (PN):	10
Pressure pipe connection (DN):	80
Pressure pipe connection (OD):	90 mm
Channel:	continuous channel
Venting connection (DN):	70
Distance pipe bottom outlet to tank bottom:	120 mm
Distance pipe bottom inlet to tank bottom: Distance from inlet pipe invert to top of tank:	135 mm 645 mm
Number of outlets:	1
Outlet nominal size (DN):	150 mm
Inlet nominal size (DN):	150 mm
Number of inlets:	1
Clear width of tank (LW):	1000 mm
Clear width of entry (LW):	800 mm
Pumping volume:	20 l
Tank volume:	65 l
Pumping device	
Pump:	SPF 1500-S1
Number of pumps:	2
